## LEARNING, TEACHING AND ASSESSMENT INFORMATION

6a. Module Description
You will be introduced to diagnosis and formulation in mental health, as well as a variety of mental health problems including anxiety, depression, psychosis and post-traumatic stress disorder. You will develop your knowledge of diagnostic classification of mental health problems and establish an understanding of theoretical explanations of mental health problems through formulation. You will also review current knowledge of aetiological factors in mental health problems, including biological, psychological and sociocultural factors. You will be taught the importance of understanding the individual beyond diagnosis, through applying formulation to case studies.
