LEARNING, TEACHING AND ASSESSMENT INFORMATION

6a. Module Description

The module explores the way stories are told in films from around the world. You will study key aspects of cinematic narrative structure, including order, duration, cause-and-effect patterns, and the distinction between fabula (story) and syuzhet (plot). You will also examine how character and voice are handled in film, the function of 'point of view', focalisation, and internal vs external characterisation. You will address theoretical aspects such as narrator and narratee, reception theory, suspense vs surprise, the key 'seven' narrative functions, narrative and genre, and the ideology of 'show vs tell'. You will analyse non-narrative (and anti-narrative) aspects of narratives, such as description, iconic shots, music, and other disruptive elements. You will also be thinking about the different roles of words (dialogue, text, sub-titles) and imagery.

You will study all of these narrative topics with regard to global cinemas. You will compare and contrast mainstream commercial Hollywood movies with non-American examples, ask to what extent continuity narrative has become the dominant pattern across the globe, examine narrative structures that do not fit the mainstream model, and analyse the intersection of global narratives with diverse identity formations. You will view films and clips from various European countries and non-Western regions, in addition to co-productions and transnational examples.

6b. Outline Content
