LEARNING, TEACHING AND ASSESSMENT INFORMATION

6a. Module Description

The role and requirements of a professional accountant extend far beyond that of being responsible for the preparation of financial and management accounts. You'll be responsible for compliance with the statutory requirements of company law and other frameworks whilst ensuring that accounting standards are adhered to, risks are identified and managed and internal audits and non-financial elements including Corporate Social Reporting and environmental issues are reported. In this module, you'll examine the nature, purpose and scope of assurance engagements, including the statutory audit, its regulatory environment and professional ethics relating to audit and assurance, underpinned with the importance of auditing theory and how it is put to practice. Internal audit will be covered, including the scope of internal audit as well as the differences between internal audit and external audit. You'll then explore a range of areas relating to an audit of financial statements including, planning and risk assessment, evaluating internal controls, audit evidence and a review of the financial statements. The final stage deals with reporting, including statutory audit reports, management reports, internal audit report and an evaluation of current issues facing auditing profession. As you go through the module, you'll gain the technical knowledge needed and communication skills to tackle real-life challenges in the workplace.

Students registered on BSc (Hons) Accounting & Finance, BSc (Hons) Accounting & Finance [extended] or BSc (Hons) Accounting & Finance (with placement year) who complete this module successfully may be exempted from the Association of Chartered Certified Accountants (ACCA) unit F8 Audit & Assurance.

6b. Outline Content

One of the main focuses for the design of this module has been the further development of relevant employability and professional skills. Such skills are implicit in the learning outcomes. Toward the end of the module the students will have enough technical knowledge and communication skills required to face real life challenges in workplace and will have ability to work as team. Part of this module corporate governance element is included because corporate governance is important element for the professional accountants. A professional accountant will have responsibility for compliance with the statutory requirements of company law and other statutory framework and, ensuring that accounting standards are adhered to, identifying & managing risk, internal audit and reporting on non-financial elements of company reporting including CSR (Corporate Social Reporting) and environmental issues. The role and requirements of a professional accountant extend far beyond that of being responsible for the preparation of financial and management accounts and this module prepares students for these challenges in the work place.
