LEARNING, TEACHING AND ASSESSMENT INFORMATION

6a. Module Description

This module presents a fusion between the philosophies which underlie marketing, with a strong emphasis of integrating digital and traditional concepts and the real life application of marketing across a variety of sectoral contexts. You'll examine the core marketing concept of customer value and the interplay between marketing and sustainability and the ethical challenges and critiques of modern marketing. You'll gain a wide range of knowledge across a breadth of sectors and be able to adapt these to whatever career or future research you choose. On completion of the module you'll have not only a solid grounding in marketing philosophies and theories but also a critical view of marketing, based around the realisation of the reality of modern digital marketing operations and management in a context of increasing global economic challenges, but also within a context where the customer profile is shifting to become increasingly demanding, critical and questioning of the motivations and ethics behind the marketers activities.

For students registered on the BSc (Hons) Business Management or BSc (Hons) Business Management (with placement year), except at The College of West Anglia, successful completion of this module provides exemption from the Chartered Management Institute's Unit 523 Principles of Marketing Products & Services.
