LEARNING, TEACHING AND ASSESSMENT INFORMATION

6a. Module Description

This module will introduce you to the system of sounds used in the English language, focussing on standard southern British English. You will learn how the various speech organs, such as the tongue and lips, are used to produce the range of sounds found in the language. We will explore how spectrograms and computer software can be used to visualise these sounds, and the terminology used to describe and classify them. You will also learn how the sounds of English are represented using the symbols of the International Phonetic Alphabet (IPA).

6b. Outline Content

- The vocal tract
- The vowel sounds of English
- The consonant sounds of English
- The English syllable
- Word stress
- Broad phonemic transcription of English
- Spectrograms and software for acoustic analysis of speech

6c. Key Texts/Literature

The reading list to support this module is available at: <https://readinglists.aru.ac.uk/>

6d. Specialist Learning Resources

None.
