LEARNING, TEACHING AND ASSESSMENT INFORMATION

6a. Module Description

This major project module allows you to engage in a substantial individual primary and/or secondary research project focussed on a topic relevant to your business degree and specialist subject area under the supervision and guidance of a member of academic staff. Supervisors will discuss with you the contemporary research problems and issues based on your research and practice, and you will conduct literature reviews, evaluate and critically appraise a range of information, investigate and adopt suitable theoretical frameworks, research methodologies and methods, and process and analyse data to produce a coherent and justified solution to the problem(s) identified. Throughout the module your supervisor will support you in terms of content and skills development so that you can work semi-autonomously on your individual research project. This is achieved through regular supervisory meetings throughout the year, which will allow for individual discussion of the tasks that will have to be completed in order to develop the project smoothly.

6b. Outline Content

Research Methods Training

- Introduction to research
- Research traditions
- Philosophical approaches
- Finding and reviewing academic literature
- How to decide on a research topic
- The research question
