## LEARNING, TEACHING AND ASSESSMENT INFORMATION

6a. Module Description
<p>In this module, you'll cover both theoretical and practical areas of international financial markets, with a special focus on investment analysis and portfolio management. There is an international approach and you'll study the subject from an international perspective, alongside students of diverse backgrounds and learning from academics with international reputations.</p> <p>You'll learn modern finance and investment theory alongside practical skills and knowledge of the finance and investment industry, with a strong focus on employability and activities designed to develop your transferable skills. You will be able to work with your peers and module tutors in the University's Bloomberg trading room to develop analytical and trading skills and as teams conduct financial investment analysis and make investment decisions in international financial markets. You will be guided to carry out independent research and critically evaluate key theoretical concepts and practical applications in finance and investment.</p>

## 6b. Outline Content

- International Financial Markets
