## LEARNING, TEACHING AND ASSESSMENT INFORMATION

### 6a. Module Description

In this module you'll develop critical and practical skills in the field of animation. You'll be introduced to a range of conventional and experimental work that helps to inform practical and conceptual understanding focussing on the frame-by-frame manipulation of shape, colour and form over time. You'll work in a number of ways encompassing analogue approaches, to working with the digital image and we encourage you to take an ideas-driven and experimental approach to the production practices.

Key aspects of animation are explored, from colour and form in geometric abstraction (Hans Richter, Viking Eggling, John Whitney, Ion Lucin), animated mark making in camera-less films (Lye and Brakhage), type in title sequences (Saul Bass), time-based infographic communication (Max Hattler) and GIFs. You'll explore various techniques including camera-less, 2D animation stop motion (cell and rotoscoping), pixelation, 8 bit animation, and computer-based animation and we'll look at how these are used in both industry and artistic and creative practices.
