

Module Definition Form (MDF)

Module code: MOD009169	Version: 2 Date Amended: 07/Feb/2024
-------------------------------	---

1. Module Title
Professional Project 2

2a. Module Leader
Sufian Yousef

2b. School
School of Engineering and the Built Environment

2c. Faculty
Faculty of Science and Engineering

3a. Level
7

3b. Module Type
Professional Experience

4a. Credits
60

4b. Study Hours
600

5. Restrictions			
Type	Module Code	Module Name	Condition
Pre-requisite:	MOD009167	Preparation for Professional Experience	Compulsory
Co-requisites:	None		
Exclusions:	None		
Courses to which this module is restricted:			

LEARNING, TEACHING AND ASSESSMENT INFORMATION

6a. Module Description

Getting extended real world professional experience in a planned supportive environment provides amazing learning and career development opportunities. This unique module aims to use your masters level learning and blend academic expertise to offer you relevant exposure to real world project and work experience and understanding of business strategy and administration management within a campus-based experience. This Live Professional Project module requires you to conceptualise, execute, analyse and reflect upon your own learning experiences and apply them to real world project and/or work experience in collaboration with an industrial partner.

You will get the opportunity to gain professional experience in different settings and tackle problems individually or within a team. Being supervised by academics, you will understand and research on variety of business administration topics such as organisational strategy, behaviour and culture, operations, and management relevant to the organisational partner. By getting involved in day-to-day activities, you will understand human relationships, contribute to tasks, listen, and learning about activities of a professional job. You will learn about commercial business considerations, innovation management, and entrepreneurship. Learning and using key soft skills in a professional environment and understanding a business structure and setting will help to enhance attractiveness to employers after completing this course. The module expects you to have a high level of independence, be proactive, engage positively with your supervisors and the team and complete independent work to agreed timelines, as you would do in the professional work environment.

There are weekly timetabled sessions where specific weekly tasks are set and ideas are discussed, but there is an expectation that you are self-driven to complete the directed learning tasks. Outside of timetabled sessions, you will be guided to draw upon the resources in the university to work towards the planned activities and research.

To enhance your professional skills for future employment, you will be supported to complete a career plan and part of this will be to identify and engage with several Continuing Professional Development (CPD) courses during the module. These CPD courses, which would be immersed within the module, can be improving core work skills or developing new ones. Evidence of completion would be submitted as part of the assessment in the module.

You will need to be in good academic standing from year 1 to opt for this module. The module will build on the Preparation for Professional Experience module which must be passed in year 1 of your course. This Live Professional Project module is a pass/fail module in Year 2. Upon completion of the module, you will receive a formal letter of achievement which is endorsed by the industrial partner. This letter can be used as further evidence of your professional experience to enhance your CV.

6b. Outline Content

- Work with uncertainty, mitigate risks, and make decisions
- Improve social resilience in a professional working environment
- Reflect and learn about organisational visions, strategies, structure, culture, and behaviour
