LEARNING, TEACHING AND ASSESSMENT INFORMATION

6a. Module Description

No matter how we communicate – whether in spoken and daily interactions or in literary works – we always use language. Without understanding of how language actually works, we would not be able to engage in proper production or understanding of it. This is what this module is all about. Being focused primarily on the English language you will become familiar with, first and foremost, the building blocks of language including its smallest units of sound and meaning. Along the way, we will explore how such small units of meaning can be used to create longer stretches of meaningful texts, including non-literal uses of language such as metaphors. You will also reflect on different kinds of voice and meaning which such devices give rise to. In this module you will gain the terminology which helps you to begin to explore the various aspects of the samples of language you are likely to encounter.

6b. Outline Content

The module may discuss the following topics and concepts:

- What are the sounds of the English language
- How is rhythm created
- How do we create words
- What is grammar
- How can we put the words together
- What is the difference between saying and meaning
- Literal vs. non-literal uses of language
- Text-type and genre
- Close reading of texts (i.e. reading for meaning)
- Word meaning vs. discourse meaning
