LEARNING, TEACHING AND ASSESSMENT INFORMATION

6a. Module Description

The Major Project module will allow you to engage in a substantial piece of individual research and creative/technological work, focused on a topic of your choice that is relevant to your degree course. Your topic will be assessed for suitability to ensure sufficient academic challenge and satisfactory supervision by an academic member of staff. Your project can be a dissertation or an agreed combination of solo or group creative/technological practice and an individually authored piece of writing. In Trimester One you will have a series of lectures to prepare you for this level of research, help you to develop of an appropriate methodology, and to decide upon the shape of your project. Your supervisor will then meet with you to formalise your negotiated assessment outcomes, agreeing and documenting any % split between writing and creative practice. In Trimester Two regular meetings with your supervisor will take place, so that the project is closely monitored and steered in the right direction. The project developed in this module is the most self-directed piece of work that you will produce during your undergraduate studies. The successful completion of this module will enhance your employability, evidencing your ability, appropriate skillset and specialist interests.

6b. Outline Content
