## LEARNING, TEACHING AND ASSESSMENT INFORMATION

### 6a. Module Description

Within this module you'll extend the knowledge you've gained at level 4. Specifically, we'll focus on more advanced Sport Psychology topics from a theoretical, evidence based and practical perspective and explore their associations with sport performance and wellbeing. For example, we'll explore in depth challenge and threat states, mental toughness, parental involvement, injury and burnout. The latest research within each of the topic areas will be examined and discussed. You'll be encouraged to apply this research to case study scenarios and real-life situations in your seminars and assignments. In addition, through discussion of case studies you'll gain the opportunity to analyse and interpret different research methodologies as applied in the Sport Psychology domain (e.g., interviews) and understand discipline related challenges concerning ethical considerations and professional boundaries. The module will be delivered through weekly sessions combining lecture, seminar and independent learning activities.

### 6b. Outline Content

- Psychological factors influencing sport performance and wellbeing (e.g., injury, parental involvement, burnout, challenge and threat states, mental toughness).
- Analysing and interpreting research methods in Sport Psychology (such as questionnaires, interviews, observation and performance profiling)
- Theoretical frameworks, ethical considerations, professional boundaries and models to deliver sport psychological support
